

inCharge®

6

The universal keyring cable

inCharge 6 is the latest product of the inCharge line, a series of keyring cables invented by Ferraris Group in 2015, with over 1 million units sold.

It magnetically snaps onto your keychain, so it's never left behind.

Being there over 5 billion USB and USB-C ports around the world, inCharge makes the low battery problem a thing of the past.

Compatibility

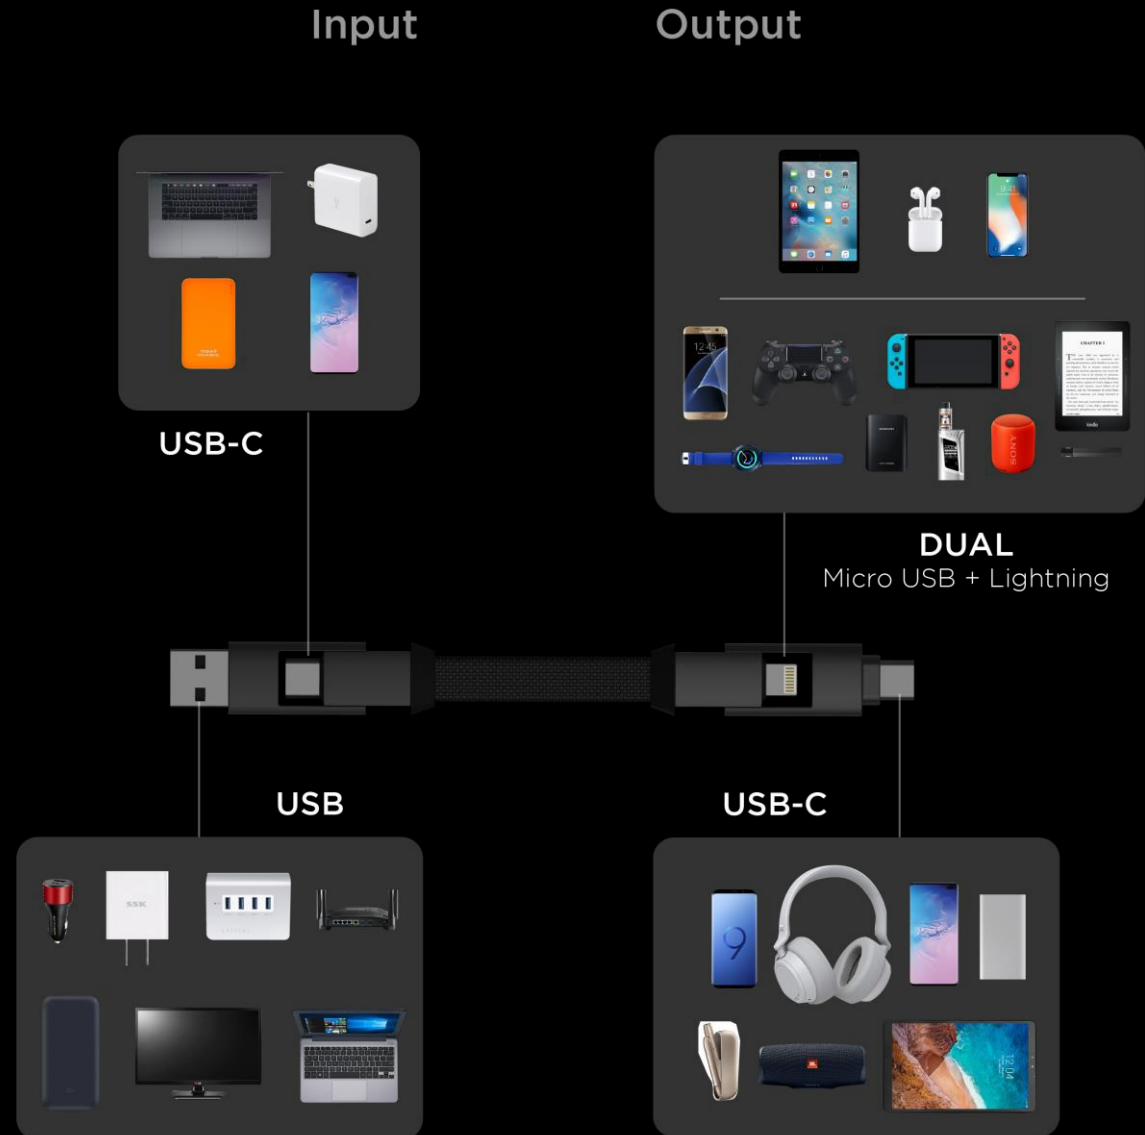

The inCharge 6 patented design allows to charge any portable device from any power source!

Compatibility

Nowadays we are surrounded by portable devices, which have 3 different charging connectors and 2 input ports. It means that people should carry many cables with them to charge their devices.

This is how inCharge was born and reached the current 6 (all) connections layout.

Imprintable areas

With 8 different imprintable areas, inCharge 6 is fully customizable with your Brand logos.

Imprintable areas

With 8 different imprintable areas, inCharge 6 is fully customizable with your Brand logos.

Side

Customization

Laser printing is the best technology to customize inCharge 6, creating elegant and life lasting engraved logos.

A unique design

Attention to details, durable materials and premium quality connectors are the key values that make inCharge a real masterpiece.

N52 Magnets
the highest magnets' grade possible.

Anti-slide system
designed to never lose inCharge 6

Metal housing

the zinc-aluminium alloy ensures components' protection and stability over time.

Cable guard

to prevent wires' damages, the TPU cable guard protects the cable from reaching its critical bending level.

Ultra lasting compound

90 braided copper wires (A), protected by a TPU layer (B) and covered with a Nylon reinforcement (C) make inCharge 6 the strongest keyring cable ever built.
