

TAU[®]

The **power bank**
you will **actually use**

Available starting from: **March 2020**

TAU[®]

The problems with **regular power banks**?

- 1) They are **bulky** and not easy to be carried around
- 2) Most of the times we **forget to charge** them back

This is why we designed **TAU**, the smallest **3in1 power bank** in the world with integrated cables, that snaps onto your **keychain**.

TAU's **magnetic charging dock** can be fixed on a counter or on a wall, and be used as a key hanger.

When you arrive at home, just **hang your keys** on the dock, and TAU will **charge back up**, without you even thinking about it!

Compatible with every device

Thanks to integrated **Lightning**, **MicroUSB** and **Type-C** connectors, TAU can charge any portable device.

A unique **smart charging system**

The **daily gesture** of placing the keys in a safe place will now have a function, allowing people to always have a **fully charged** power bank when going out.

Simple setup system

TAU's charging dock comes with a very **simple setup** system.

You can double tape the **wall mount** to any surface, and the dock will be operative **in seconds**.

The charging dock is powered by a **USB cable**, which can be plugged in any USB port or wall charger.

Magnetic charging pins

Easy opening metallic hook

Dock wall mount
(screws / double tape)

USB power cable

TAU[®]

Small, but powerful

We have found the **optimal balance** between power and portability:

1400 mAh capacity packed into an incredibly compact **60x45x14 mm**.

That's what makes TAU the perfect **emergency power bank**: always charged, always with you.
